RE: Support SB 32 and SB 350

Dear Assembly Member Levine,

The Marin Conservation League urges your support for passage of SB 32 and SB 350.

Please stand strong for your constituents and for climate leadership in the face of heavy lobbying by the oil industry. These bills send an urgent message to the nation and the world about California's commitment in setting serious targets for reducing emissions and moving to clean energy solutions.

We are confident that the goals they set are entirely achievable.

Please do everything you can to convince other Assembly Members to join you in voting Yes on SB 32 and SB 350.

Thank you for helping make climate history.

Sincerely,

A handwritten signature in blue ink that reads "Kate Powers".

Kate Powers
President
